THURSDAY

ARTISTIC INVENTIONS with Ms. Kristen

3:00-4:00pm
Meet in Room 19

There is an enduring relationship between Science and Art, and we always enjoy exploring this connection. There was a time when artists were scientists who had a thorough understanding of chemistry, botany, mineralogy, and the latest technological advances. This session looks back to these times, introducing children to the possibility of creating his or her own art materials and creating art pieces using these materials. It is our hope that by going back in time to artistic alchemy, students will open their eyes to the endless possibility of artistic invention.

DATES
